DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

- a. Claims 1, 3-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Starostovic Jr. (U.S. Patent 5,699,274) in view of Pfenninger et al. (U.S. Patent Application US 2001/0031457) .

Starostovic discloses a material testing system machine having a load mechanism for applying load to a test piece (col. 2, lines 41-58), sensor for detecting information regarding a load cause by the load mechanism and information regarding a condition of the test piece accordance with the load (col. 3, lines 9-30), and a computer electrically connected to the sensor (fig. 1, unit 120) for receiving output from the sensor and processing data of the test information, an outside provider electrically connected to the computer (col. 4, lines 46-56), information electrically connected to the outside provider for receiving output of the computer through the outside provider (fig. 1, 9, unit 120, 116, 99) .

Starostovic does not disclose having a web site established therein for receiving outputs of the computer to update the test information periodically to the web site, said web site including updated test information accessible at any time from another computer or a portable terminal, using a cellular phone. Pfenninger discloses having a web site established therein for receiving outputs of the computer to update the test information periodically to the web site, said web site including updated test information accessible at any time from another computer or a portable terminal (section 0042, fig.1), using a cellular phone (section 0026), in order for users have a quick access to the system result and can be quickly viewed by a users variety of information at a remote location (section 0010).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Starostovic to have the having a web site established therein for receiving outputs of the computer to update the test information periodically to the web site, said web site including updated test information accessible at any time from another computer or a portable terminal, using a cellular phone taught by Pfenninger in order for users have a quick access to the system result and can be quickly viewed by a users variety of information at a remote location (section 0010).

Response to Arguments

2. Applicant's arguments with respect to claims 1 and 3-7 have been considered but are moot in view of the new ground(s) of rejection. However, applicant's arguments filed 2/6/2003 have been fully considered but they are not persuasive.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tung S Lau whose telephone number is 703-305-3309. The examiner can normally be reached on M-F 9-5:30.

Application/Control Number: 09/922,780
Art Unit: 2863
